

SMART, speedy ventilation installation and sign off helps ensure GIP compliance on-site in new homes

“Touch-pad technology for installer happiness”

New build electrical contractors E W Gee Ltd of Dover, Kent is a fan of Unity CV2GIP. Delivering electrical solutions to approximately 1500-2000 dwellings per annum across Kent, Sussex and Surrey, E W Gee Ltd operate in both the social and private new build sectors.

Working alongside key housing associations and housing developers to deliver the best possible ventilation solutions, E W Gee Ltd recommends the installation of Greenwood’s Unity CV2GIP dMEV fan within the bathrooms and kitchens of their client’s properties.

GREENWOOD COMMISSIONSMART™ TECHNOLOGY

The ultimate single point extraction fan for any application, Unity CV2GIP is an excellent all-rounder and benefitting from Greenwood

CommissionSMART™ technology has been designed for fuss-free installation. Sean Upton at E W Gee Ltd explains, “One of the key benefits of Unity CV2GIP is its ease and speed of installation.

Fitted with touch pad technology for fast and accurate commissioning to Building Regulation requirements, it is the ideal product for our electricians. Once they have fitted one fan, any repeat installations are straightforward, ensuring a cost effective and high quality service for our customers.”

“In addition to the practical aspects of the fan, the aesthetics are also first class”

Set up for;

Bathroom or Kitchen

Trickle and boost speeds – with 100% adjustability to ensure GIP

Controls: Greenwood HumidiSMART™ and Greenwood TimerSMART™

GREENWOOD COMMISSIONSMART™ TECHNOLOGY: TOUCHPAD FOR SIMPLE SET-UP

“In addition to the practical aspects of the fan, the aesthetics are also first class” adds Sean.

“The modern and discreet circular design is very popular with our clients and the small size of the unit makes it ideal for use in kitchens.”

Combine this with an extremely quiet running noise and Unity CV2GIP is the perfect inconspicuous ventilation solution for today’s discerning householder.

Having worked with Greenwood for over 25 years E W Gee Ltd is a key and loyal customer. Reflecting on their working relationship Sean comments.

“We have been very happy working with Greenwood all these years. Over this time both the sales and technical support we have received has been excellent and the product reliability has always been high. As one of our long-standing suppliers we look forward to their continued support in the future.”

GREENWOOD GIP PRODUCT

Unity CV2GIP is a Greenwood GIP product. GIP standing for Guaranteed Installed Performance is a core principle of Greenwood Airvac and above all stands for getting ventilation right.

Greenwood want to ensure a healthy indoor air quality, speedy installation and the reduction of risk associated with non-compliance to Building Regulations.

Greenwood GIP products are designed to be simple and easy to install with 100% adjustable performance - after all what’s the point if it isn’t doing the job it’s supposed to?

SMART Technology from Greenwood also then ensures their products continues to achieve GIP throughout it’s lifetime.

Why specify Unity CV2GIP?

- Simple System 3 (dMEV) compliance with Part F Regulations: One fan, any room
- Directly contributes to Dwelling Emission Rate reduction in SAP
- Low energy cost effective continuous ventilation solution for existing homes
- A discreet ventilation solution for bathrooms and kitchens with very low running noise
- No nuisance running and unnecessary heat loss with Greenwood SMART technology: Greenwood HumidiSMART and Greenwood TimerSMART
- Installer happiness - an innovative and unique touch pad for set up and commissioning on site

Spotlight on Greenwood TimerSMART™

Greenwood TimerSMART uses a logical and innovative approach to timing based on how long the fan is switched to boost mode e.g. In the bathroom for 5 mins - overrun for 5 mins...

This stops nuisance noise and unnecessary energy wastage when compared to typical overrun timers, e.g 20 mins. Especially beneficial with continuous ventilation from CV2GIP
